

# Urth's Fu-story

## ★ Sirius

The widest cycle in time we have is the Precession of the Equinoxes and the cycle of the solar Village through from **Pisces to Aquarius**. We are in the 500 year transitional cross over of this process. Our Solar Village is also aligning with the Galactic Core. Our sun and all the planets in the village, are experiencing transformation and vibrational quickening. The Galactic Core impresses a strong magnetic pull on the Solar Village. Perhaps this is the time of the Photon belt approaching. Sirius is also streaming forth and energising us with the 7<sup>th</sup> Ray. The 6<sup>th</sup> Ray is retreating.

Who knows how this will be for us? It's Big, its Cosmic and we are along for the ride.

\*Please print off this diagram as your page one. Use it as a guide as you study the document.

## Intro...

This year, **2007** sees the Grand Finale staged by Jupiter and Pluto in Sagittarius. We have been put through the wringer and hung out to dry in the winds of change. We have walked the burning earth. Many are still engaged in old conflicts over ideologies and resources that we are all quite capable of sharing in a dignified and civilised way. We have discovered that our beliefs and philosophies not matter how (un) conscious we may be of them, influence our lifestyles and our choices in every aspect of our being.

The revelations that have surfaced during this last decade have had a profound effect upon the peoples of the world. For some, perhaps more than we realise, it is the open discovery of these truths that is new, not the facts themselves. For many – those preoccupied with the more mundane daily task of survival and living – it is a case of discovering how the revealed truths are affecting their lives without them knowing it.

The visions that humanity had before them in the mid 1990's when Pluto began its journey through the gypsy Sagittarius, have changed somewhat. Many have now come to embrace the scientific and technological advances (Virgo) which once confounded them; others have reviewed and refined their ideas about what 'should' happen. We have all grieved in some way or another, the 'should have beens' and the 'what ifs'.

We have been greatly distracted from our original visions during this cycle. World events have preoccupied governments and nations, cultures and creeds and we have all been somewhat detoured from those dreams, wishes and plans we carried into the early 1990's. Yet, what HAS emerged is a greater sense of a peopled planet in a wondrous Universe and an expanded awareness of how we share this planet with the mineral, plant and animal kingdoms. We continue to interact with each other across time and space with an immediacy that seems futuristic in the now. What was once the privilege of the educated few is now available to the many.

The resultant effects of this expanding awareness are profound. We are dissolving the apparent distances that separate us – be these of time and space, philosophies, cultures, creeds, age or genders. The old class systems seem ridiculous; the man made borders and boundaries are being questioned. Thank God for telescopes and satellites! We have a new vision of our world and therefore of our place in it. What were we thinking – why did we live in that way?

## What Now?

There are many prophecies and legends that were written with the intent to guide us through these troubled and soul stirring times. Some of them were written with fear, as warnings based on what was glimpsed. Others were more objective and detached and perhaps under-estimated the subjective experience of the people involved. All these, including our religious texts, our sacred works, our beloved authors and stories, legends and folktales, can now be seen in the contexts of the time/space in which they were birthed. They can take their rightful place as landmarks through the grand adventure of an evolving world.

Now, beliefs are not as important to us as **faith**. And faith is a last resort for we humans 'want to know the truth' these days. We want to be **conscious participants** in life.

In some ways, we are at a standstill as a species: in a null zone of no longer being able to live unconsciously, yet not quite enlightened enough to know what that distant star is on which we can hitch our current soul kits and human selves.

It is a difficult and dangerous point in the adventure. A poignant moment.

It is difficult because we quite simply have been so driven for so long by basic survival needs, wars and conflicts, the challenges of building and rebuilding civilisations, the urge to create and procreate and overcome many painful and debilitating experiences. Those old expressions like 'soldier on' and 'life goes on', 'it will be alright' and 'what will be shall be': these no longer satisfy nor comfort. We have seen and/or experienced for ourselves too much, in too short a time.

It is a dangerous time, for now we are vulnerable to the + 1's of external events that seem beyond our control. It is easy at this stage to relinquish any desire for self mastery or control over our lives and just hand over our little wills to the Universe (or anyone else) at large.

Breathe! That is air entering your body, filling your lungs, clearing your blood, transmuting lots of 'stuff' and exhaling it out into the world again. That's what we need to keep doing – micro and macro. It helps.

## The unfolding story.

**Jupiter and Pluto in earthy Capricorn 2008:**

**Transformation of Civilisation**

**[Pluto in Capricorn 2008 to 2024]** Yes, it will take that long. ♃

Jupiter and Pluto entering Capricorn from December 2007 will bring about big changes. Some of these shall definitely be external and destiny, karma and fate will seem to still hold sway in this world. They are illusory words created to explain what our minds and hearts struggled to grasp.

The earth is changing. She (Gaia) has her own agenda. She has been interfered with: she has been devastated, burnt, bruised and battered, gouged, poisoned and skinned alive. Her cycle to change is timely anyway, and she is tired. Perhaps her enthusiasm in greeting the cosmic doorways is understandable. She is our home for this (time) of being human.

Capricorn rules the earth's crust, the tectonic plates that shift and settle protecting the inner energy sources and providing us with a viable surface on which to live, laugh, play and work and yes, to evolve. The pull from the Galactic Centre has aligned the solar system and the Urth. She's been to the Chiropractor's. The ensuing time of Pluto in this sign will keep this alignment in place, for it has been the closest, and the most magnetically attuned, to that Galactic Center. Like a child with a magnetised magic stone in its pocket, we travel on.

Individually and collectively, we shall be continually adjusting for the next 16-20 years.

**Physical** care, healthy organic foods, simplified lifestyles, stretching, exercise regimes that suit your own body and spinning will be most helpful. We shall need to re-organise the structure(s) of our lives.

**Time** will become most significant: for renewing your spirit, and regenerating your energies (physical, emotional, mental and spiritual); for adapting to change and pondering deeply the way ahead. As the vortex of energies increases it will also seem to reduce the possibilities and probabilities compared to the broadness of experience of this past decade. Think birthing tunnel or wormhole. Our experience of time is changing, for it is dependent upon fields of energies that are also transforming. This strangeness with time/space will accelerate. Take your time.

Nervous systems, endocrine systems and lymphatic systems will experience fluctuating energy fields. Learning to recognise what is occurring and granting the body timeout to re-align and adjust will help you modulate moods and hormones.

**Resourcefulness** is an acquired skill and if you have already developed this, you will be most useful to yourself and those around you. Improvising, being creative, lateral thinking and holographic awareness will likewise assist you through the transition.

**Intuitive and sentient perception** means you will be able to see clearly through the forests and mists of unfamiliar terrain. Use whatever helps to develop these faculties in yourself.

**Integrity** means being whole and remaining intact amidst warring and threatening demands upon different aspects of the self. This is where holographic perception also helps. Practise seeing all 6 planes of existence. That means up/down: left/right: in front and behind. Honesty of response and authenticity of being become therefore imperative as characteristics of the personality. If you are not yourself, you won't make it.

**Virtue and the Will-to-Good** are noble facets of the rough diamonds we are becoming. Practise makes perfect ... eventually.

**Patience and perseverance** are often cited as Capricornian qualities. I have personally experienced much im-patience and frustration as a natal sun Capricorn, but I have learned that to have a **Purpose** in Life enables these qualities to emerge naturally. Having a deeply cherished sense of Purpose means you are never bored and never alone. It also means you do not need to be afraid of anything anymore. And it grants your life the gift of quality and personal dignity.

**Quality** of Life, of people, of places, of things, of nature: Quality work, creations and choices. It saves time and effort needed to sort out and clean up the mess - and reduces waste.

**Simplicity, Silence and Humility** become friends along The Way. They un-complicate in a world that entangles us too easily.

The Capricornian overlay will seem stifling to some, and a refuge and relief to many. Esoterically, it is the sign of initiation and ultimately, *illumination*, whereby the disciple becomes the initiate: the vision is transmuted into realisation; seeking for meaning ends, seeking freedom is no longer relevant, for the soul is free. It stands again in the Light and knows it has returned. It becomes the Light and knows it shall never again be separate. The darkness and the lower plains no longer attract, nor do they threaten. Understanding and meaning give way to clarity of significance.

Capricorn is the doorway home, just as Cancer is the doorway to incarnation. Step through and the soul meets the Hierarchy of Masters and Teachers who have 'graduated' and have chosen to stay with humanity for the time being, to nurture and guide the species through its unfolding **Purpose**. It is what we have before us. Those who are ready for, welcome and cherish this experience will be prime candidates for Solar Village 3.

The Cardinal Signs, the Hierarchy and Shamballa are connected and vibrate on common plane /realm. Embracing and working with those who live with sense of Purpose however they perceive that. 2024 is the timeline for the completion and fulfilment of the Emergence of Shamballa as in the Ashrams and the Hierarchy of Masters and Teachers.

Traditionally Capricorn rules over civilisations and governments. **What is 'being civilised'?** Quality of Life. Dignity, respect, resourcefulness, etc. Think about it. Planetary wide. Crystallised Light. Enlightened superstructures and illumined frameworks. Application of the characteristics will harmonise development. Resistance will cause fracturing and suffering. The skeletal inner frames will not hold. The whole collapses.

It is not *order* we need – rather, wise and thoughtful **design**.

The masses, 'children' of evolution, are ruled by Cancer regardless of their individual sun signs. The **Transformation of the Status Quo** embraces those not ready to leave the herd. Leaders emerging in this stage of Urth will (need to be) powerful, enigmatic, practical, wise and realistic.

They will not be elected for personality, looks, charisma or enticements. They will look further than the leaders of the past for they can see 360 on the mountain top. Enter the holographic, spherical and inclusive thinking. They will brook no negligence, nor corruption.

This period in Urth's history will invariably transform the earth itself as well as its civilisations. Dependency upon governments to 'do the right thing', make all the decisions, and to take care of us, is childlike. Working *with* governments and organisations for the good of the whole is the way of the future. Our species is growing up. In the depths of disillusionment and realisation that our leaders are just humans like us, mass humanity *will* grow and accept conscious responsibility. [This is what happened when America fought for its independence from the 'mother/father' lands of Europe]. Those who do not want to grow will complete their own cycles in time with reducing involvement and participation. Rebellion and revolution will transform oppressive regimes that favour the elite at the expense of the masses.

Organising societies that take of everyone, is wise and efficient, humane and immensely practical. Human resourcefulness and humans as valuable resources will come into focus. There will be massive reductions in populations. Ideas like 'job sharing' shall be looked at from another perspective. The military will transform its purpose to Community Service.

### **The Planets dance in the Solar Community.**

#### **4**

Jupiter in Capricorn 2008 Earth: Jupiter does not fair well in Capricorn. The urge to expand meets the need to contract and stabilise. Expansion/contraction causes spiral of evolution. End of imperialistic thinking for it is no longer needed. Understanding of role of Governments and what CAN be done. Skills and Trades become important. Need for Integrity and Diplomacy – BIG time. Beliefs re poverty and lack become obvious. Feudalism reveals itself. From the materialistic to the Dignified Soul. The mountain looms ahead. Deep Blue. Earth's crust expanding.

Jupiter in Aquarius 2009 Air: Expansion of our Consciousness as a species. The fourth (human) Kingdom acquires a self identity and its own sovereignty. Intelligent Love. Expansion of beliefs re human species as valuable and worthy of Galactic participation. Human Rights Charters. Expansion of education, information and development of the mind. Awareness of much to learn... Aquamarine and 8<sup>th</sup> Chakra. Access to Cosmic knowledge. Hurricanes, windstorms, dust storms and tornadoes.

Jupiter in Pisces 2010 Water: Rising of oceans and water tables, collapsing of earth/islands. Mists and tropical weather, cyclones, flooding and infections. Expansion of religious fervour-evangelism – Armageddon beliefs. 6<sup>th</sup> Ray devotion and fanatical behaviour. Gambling and risk taking. Need for compassion and kindness. Refugees. Personally I hope it heralds the Second Coming to calm the people. Spiritually adept leaders. King Arthur and Camelot.

Jupiter in Aries 2011 Fire: With Uranus entering Aries and Jupiter there as well – let's all think about a new way of life. We can always start again- it's the secret of healing. Reboot.

Jupiter in Taurus 2012 Earth: Financial systems overload. Expansion of bartering and sharing. Paradigm of exchange of energies. Buddhist, nature provides, live simply. Return to earthiness and organics. Natural beauty and generosity flourish. For the unevolved – explosive greed and power grabbing. Boomerang.

#### **5**

Saturn in Virgo 2007 -2009 Earth: Maturing and taking on responsibility by the Pluto in Virgo group born 1957 to 1972. Time to get real about health, work practises and structural organisation. Skills become new 'value'. Real experience as measure of worth. Issues of low self

esteem amongst human species – depression and lifestyle work practises that ‘dampen’ spirits. Clean up of food manufacturing practises and products. Overwork and stress causes ill health.

Discoveries re Time; Natural Medical practises and products; new streamlined, efficient and clean technologies; new housing and clothing designs; discoveries of mineral kingdom and healing properties. Clean up of mineral and resources sectors. Downturn in exploitation of earth’s mineral resources.

Minimalisation becomes fashionable – jewellery and fashion people take note. The gaudy is out. Glamour and celebrity stuff is boring and waste of resources; not being smart is passé. Includes reduced lighting in cities. Job creation of ‘worthless’ manufacturing and business is spotlighted. Conservation and sustainability issues in many aspects of our lives! Ban on child labour. New film/photographic techniques emerge. Working with Light. Photonics, Quantum Physics and Science that eases burdens and simplifies. Clean up of Journalism and News practises. Thoughtful discussion and exploration of possibilities favoured over drama. Solutions.

Analysis of efficiency reinforced as measure of worth. ‘Does it work?’ If not, chuck it and recycle. Includes people, Governments and policies. Focus on expertise in practise as measure of executive ability, not just managerial or financial prowess. End to huge payouts of CEO’s. Corporations folding due to over extending. End of ‘money’ as coins and paper. End of printing money and artificially created wealth practises. Gold as measure of \$ ? We have less money but things become cheaper –especially services. Fall of \$ as is - then reorganisation. Stockmarket revealed as unworkable and been ‘shored up’.

Saturn in Libra 2009 -2012 Shamballa: Focus on unfair work practises. Sharing of work loads, resources and profits; shareholders as participating workers in Companies; Change in how judicial system works - end to Justice and Legal systems as they have been. Focus on rehabilitation rather than prison system. End of jury system. Emphasis on training and mediation. Parenthood as professional occupation. Licensing of parents? Social requirements of responsible parenting. Reducing fertility rates.

Esoterically - Spirit and matter in balance point on Urth and in the kingdoms. Those not ready for this shall gradually vacate. Includes the species of mineral, plant, animal and human Kingdoms. Balance of genders. Incoming 1<sup>st</sup> and 7<sup>th</sup> Rays. [Uranus in Aries] Major societal upheaval.

**2012 /13** calculated as the end of a Venusian Cycle. Graduation. Souls incarnating from then on will be able and willing to adjust to a sacred planetary world. Aligned naturally with their Higher Selves (Venusian influence) and strong mind/soul connection. It will take 40-50 years for present souls to complete lifetimes and vacate. There will be a transition period. Gradual influx of new race (consciousness) – it will take time to integrate and evolve the diversity of physical streams as suitable vehicles. We are ‘Growing a Species...’

\*NB: NASA has reported that a massive Solar Cycle is expected to peak in 2010 -11. It fits with Jupiter in Aries in 2011 and Uranus in Aries in 2010.  
Reference at [www.science.nasa.gov](http://www.science.nasa.gov) release date 21 Dec 2006

**Beyond 2012 ...**

**[Pluto still in Capricorn]**

Uranus in Aries 2010 -2018 Fire/ Electrical: Trining the Uranus in Sagittarius soul group born in the 1980’s. Some really unusual leaders and people (movements) emerging! Massive awakening

and quickening of frequency. Insanity for those brains unable to take it. Discoveries re how brain and body work. Higher Mind. Magic and wizardry, alchemy and very unusual phenomena. Electrical storms and old electrical systems collapsing. New technologies and inventions – necessity. Rebellion and revolution from those oppressed. Freedom and eccentricity. 'Out of the (Electric) blue' and ultraviolet light. Third eye - brow chakra activated. Start anew – Higher Vibration. Fire. Volcanic activity.

Uranus in Taurus 2019 -2026 Earth: Planet quickening. Earth changes, earthquakes, strange occurrences and behaviour in animal/plant/mineral kingdoms. Some go extinct, new ones emerging. Use of earth grid for energy systems. Rebuilding but not in same old way. Domes, new housing methods, new lifestyles and back to nature stuff. We become 'lighter'. Our cellular bodies vibrate at a faster rate. Silicon. Beyond carbon.

Uranus in Gemini 2026 to 2034: Telepathic abilities growing. Mind integrating with brain causes physical changes. Communication systems change – physically for us humans as well as our technology. Eyesight and insight. Magnetic vehicles.

Neptune in Pisces 2011- 2024: Spiritual and Psychic gifts, healing gifts emerging in many. Living our spirituality. Etheric vision and etheric healing. Ether as 5<sup>th</sup> element. Sound/ Music and healing. [Infections and viruses] Oceans and water tables. Sea villages and cities close to water. Living in the ocean. Rainforests. Hidden treasures in water. Refugees from low lying lands. Deception. Avoid sects and religions that are fear based and demand devotion. With Uranus in Aries, the seers will be busy. Mystery and phenomena. Epiphanies, lucid dreaming and sleepiness. What is the Christing-of-Humanity?

**2024:** Emergence of the Hierarchy complete.

**2025:** Neptune into Aries. Mists, firmament, tropical and ethereal. A new world cycle begins.

## The Soul Grows

The Aquarian Age is about Intelligent Substance and Intelligent Love. Community, round table conferencing, group synergy. From Intellect to Intuition. Occult and Mysticism unite. Science and spirituality integrate. The mental bodies. Thirst for Knowledge. Renaissance. Value of human species. Takes until 2300's to settle in.

The Seventh Ray and the 7 pointed star are being gifted to us (streaming forth) from Sirius. Seven Chakras, seven colours, seven notes – human being becoming whole. Physical, emotional/astral; mental/conscious; spiritual/soul awake.

The Fifth Element and the fifth Kingdom and the 5<sup>th</sup> Race of Consciousness (NOT cultural but Consciousness level) gradually seeping into our world. By 2025/26, it will become quite apparent that the species is changing and evolving. [Ether, Souls and Intuitive Intelligence]

= = = Love of Life and the Wisdom gained only thru experience is the speciality of this campus – our Solar Village is specialising in the 2<sup>nd</sup> Ray known as Love/Wisdom.

An exercise for you:

Write the words LIVE and LIVED on a piece of paper. Hold them up to a mirror. You can live in a reflection of God's Kingdom or in the real one. May we choose to LIVE and have LIVED. That way we gain wisdom from all that we experience.

**Notes from the Cosmos:**

§ Quote:...Alex Collier. Articles re our DNA, the Genome Project and ET's.

"...there are over 135 other billion human beings in the 8 galaxies closest to ours...

"We have a very bad reputation," Alex Collier indicates, "because we are the only human race in the galaxy that kills itself, that turns on itself. We are the only race [human] that allows itself to live in poverty. We are the only ones who allow members of our race to starve. We are the only ones that allow members of the race to be homeless. We are the only race that would sell itself into slavery. I don't like the reflection they give me of us. It's not that they are judging. They just don't understand why we do it. If anyone's got an answer for it, I'm open. Yes, we've been manipulated by belief systems, but why do we believe these belief systems?"

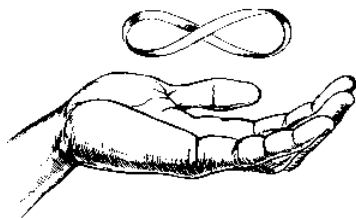

§ 'The root thought that flourishes as neglect and indifferent abuse of the physical existence is this:

*That being in the physical on earth is at the bottom of a perceived universal spiritual hierarchy.'*

ShaVrill on Page 13: **Pendulum: A Theoretical Framework for Change.**

§ 'In rainbow's end the spectrum circles 'round,  
'though human nature's clouds of doubt do form.  
Begun in Time by laws of wisdom-sound,  
In crystal Lotus cosmic souls are born.

Hilary on page 41, **Dawnings.**

**Blessings Along The Way**
